Permit To Engage in Surface Mining

LAND RECLAMATION COMMISSION

ISSUES TO
BUNN ENTERPRISES, INC.

Pursuant to "The Land Reclamation Act," RSMo, 2001, and on conformity with the statements

In the application, a permit is hereby granted to engage in surface mining of
sand & gravel in the state of Missouri. The extent of the

Proposed mining operation(s) will be on one acres, more or less.

The locations of the operation(s) under this permit is/are as follows: Renewal

County	Section	Township	Range	Acres Renewed	Acres New	Total Acres	Site/Stream Name	Site Number
Ralls	19	56N	03W	.5	0	.5	Site #1/Hascall Creek	0772
Marion	21	58N	05W	.5	0	.5	Site #2/South River	0773

This permit may be suspended or revoked upon violation of any or all of the conditions set forth in "The Land Reclamation Act," RSMo. 2001, or in such rules and regulations as are promulgated pursuant thereto by the Land Reclamation Commission.

IN WITNESS WHEREOF I have hereunto set my hand this 14th day of May 2004

RECLAMATION COMMISSION

TYPE OF PLAN
(CHECK ONE):☒ SHORT TERM, FOR ONE PERMIT YEAR☒ LONG TERM, FOR PERIOD THROUGH DATE: 5/3/2009 Company Name: Bunn Enterprises, Inc.

DESCRIPTION OF STREAM CONDITION PRIOR TO LAND RECLAMATION COMMISSION PERMITTING (BY APPLICANT OR PRIOR OPERATOR), INCLUDING BANK CONDITION, BANK VEGETATION AND WATER QUALITY.

The area to be mined involves a 1/6 mile stretch of Hascall Creek along County Road N near Junction N and Highway 79. (See Map) This section of the creek is bordered by Rt. N and pasture land. A narrow strip of trees borders the farm side of the creek. The water quality in the creek is good to excellent. The banks of the creek vary from gently sloping to steep. (Photo of the creek is enclosed)

DESCRIBE METHODS USED TO REDUCE DAMAGE TO STREAM BANKS, SUCH AS PROTECTING BANK VEGETATION, IF APPLICABLE

Permittee will mine the stream in such a manner as to prevent damage to the water flow, prevent damage to the stream bank vegetation, and prevent damage to any of the natural surroundings. Water flow will not be directed toward the stream banks. A twenty-five foot swathe of gravel will be left undisturbed between the operation and the stream bank vegetation.

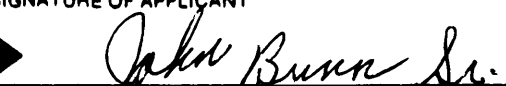

DESCRIBE METHODS USED TO REDUCE DAMAGE TO STREAM ENVIRONMENTS, SUCH AS KEEPING ACTIVE MINING OPERATIONS ON GRAVEL BARS, RATHER THAN IN FLOWING WATER, AND KEEPING HAUL ROADS AWAY FROM FLOWING WATER, IF APPLICABLE.

Gravel removal will be restricted to the exposed portions of gravel (gravel bars). We will shave the tops of the gravel bar to a depth no deeper than the normal water level. This will avoid causing erosion of the stream-bank and channel at the mining site and upstream (headcutting). Although we must cross the stream to access the gravel bar, we will always cross the creek at the same place.

Gravel removal will be restricted to periods of low flow. A twenty-five foot strip of gravel will be left undisturbed between the excavation and the stream-side vegetation. A buffer strip will also be left between the excavation and the flowing portion of the stream.

By my signature, I attest to the following:

- 1) All statements made on this Mine Plan Form are correct, complete, and true, to the best of my knowledge.
- 2) I or the company I am authorized to represent intend(s) to mine in accordance with this Plan, and in accordance with the Missouri Land Reclamation Act, Sections 444.760 through 444.789, RSMo (Supp. 1990), and all rules, regulations, orders, decisions and permits of the Missouri Land Reclamation Commission pertaining to my company's surface mining operations.
- 3) I have a valid agreement with all landowners which gives me the right to grant access to the Director of the Missouri Land Reclamation Commission and his authorized representatives, and I grant such access, and further where I have no right to grant such access, I have attached signed affidavits from the landowners granting such access.
